## Parker 800 Cruiser Large Weekend Cruiser

The cockpit is the most important part of a large, functional and successful daycruiser and weekend boat!

The 800 Cruiser has the same cockpit layout and size as its big sister, the 850 VOYAGER Cruiser, and is mainly designed for the cruiser segment of the daycruiser market.

The cockpit is large, flexible and functional, with both sunlounger and seating facing the bathing platform.

Below deck, there is plenty of space and comfort for daytrips and weekend trips. The 800 Cruiser can sleep four persons and has a large, spacious toilet room below deck.

The customer decides whether to fit out the boat for daycruising or for weekend trips.

# Hull, comfort and fuel economy

We have continued to build upon our successful concept with our optimised two-step hull, integrated engine bracket and deep V-shaped bottom.

Driving performance, sporty qualities and comfort are top priority in daycruiser and weekend boats. This type of step hull with integrated engine bracket eliminates almost all the planing threshold, reduces the need for engine power, increases top speeds and improves fuel economy.

# Technical data

Design category:	C
Production technology:	Infusion
Length:	8.03m
Beam:	2.75 m
Dry weight:	2,100 kg (without engine)
Fuel:	230 litres standard
Diesel tank:	15 litres (optional equipment)
Fresh water:	100 litres
Septic tank:	40 litres
Fridge drawer (standard)	35L
Fridge drawer (option)	35L
Persons:	Max. 8
Recommended engine Single:	Outboard 300 - 350 HP XXL

# Standard equipment
